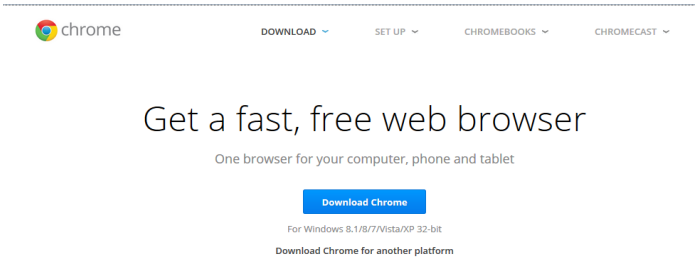
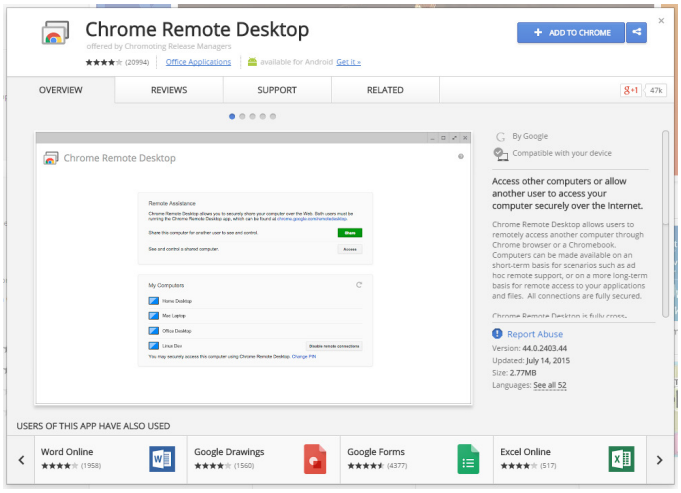
Chrome Remote Desktop

Instructions for screen sharing or accessing another users screen



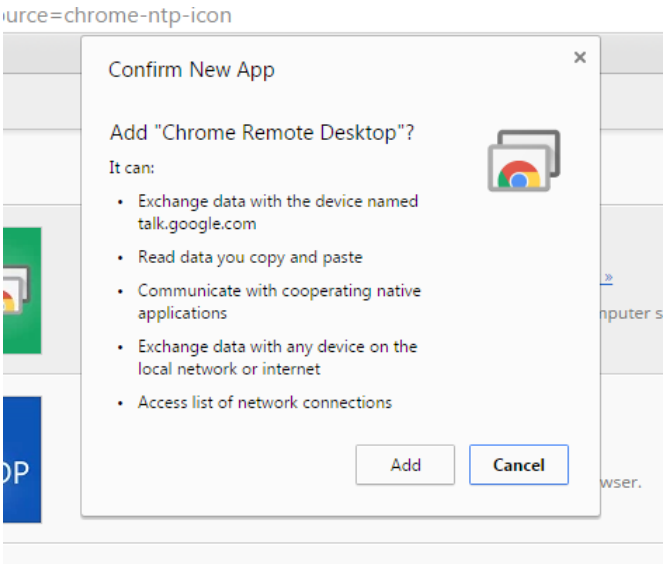
Downloading the Chrome Web Browser:
The Chrome Remote Desktop App runs in the Chrome Desktop-based Web Browser. That web browser is available for free at:
https://www.google.com/chrome/browser/desktop/

Follow along with the on screen instructions to install the Chrome Web Browser.



Downloading the Chrome Remote Desktop App:
Using the Chrome Web Browser download the free Chrome Remote Desktop App for the Chrome Web Browser at:
https://chrome.google.com/remotedesktop

Click on **Add to Chrome** to install the Chrome Remote Desktop App. Click **Add** to confirm the installation of this app.



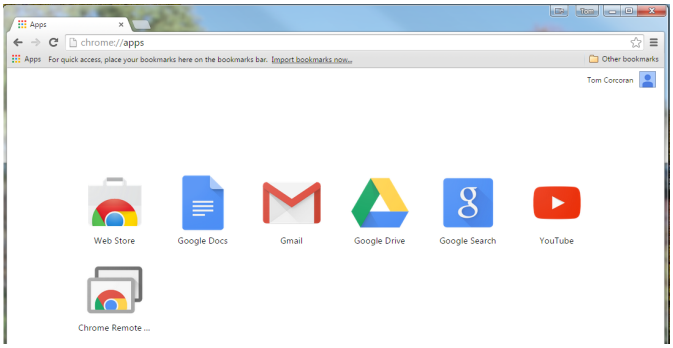
Both users (screen sharer and screen accesser) will have to have the Chrome Remote Desktop App downloaded and running in their Chrome Web Browser to share or access a shared screen.

There is no audio component to this screen sharing through the Chrome Remote Desktop App. You'd need to be using a phone to communicate with the other user.

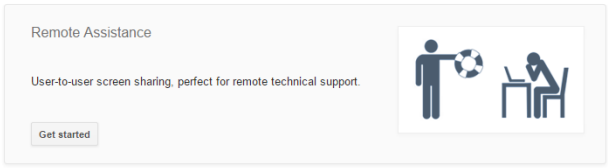
Chrome Remote Desktop

Instructions for sharing your screen

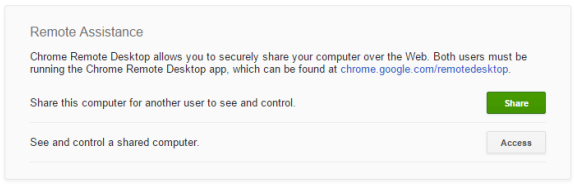
Sharing Your Screen



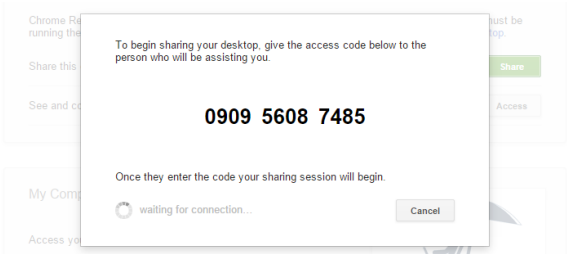
1. Load the **Chrome Web Browser** and be logged into your Google Account (username@my.heartland.edu),
2. Click on **Apps** in the Bookmarks Bar (under the URL address) or go to chrome://apps/,
3. Click **"Chrome Remote Desktop"** from the list of Apps shown on screen,



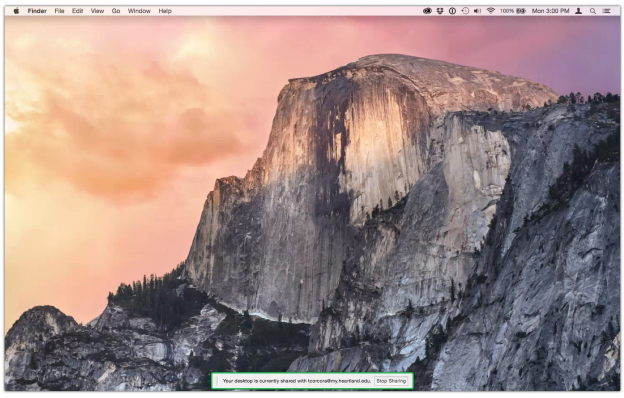
4. Remote Assistance is available at the top of the screen. Click the **Get Started** button,



5. Click **Share** to share your screen,



6. Give the **access code** shown on the screen to the instructor so they can type it into their computer,
7. Wait until the instructor accesses your computer,



8. The Instructor will have control of the students desktop until the Instructor (or student) clicks the Stop Sharing button at the bottom of the student's desktop screen.

The student still retains ultimate control over the mouse so they can stop sharing their screen at any time.

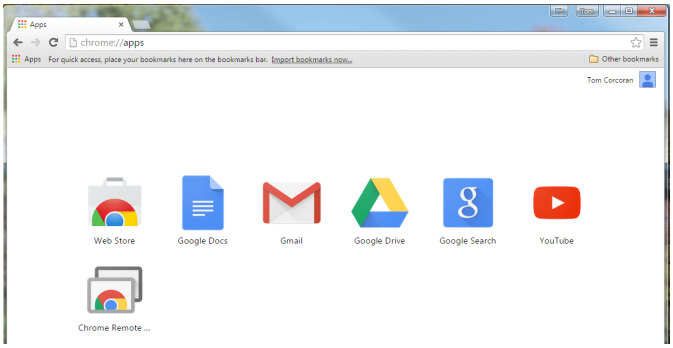
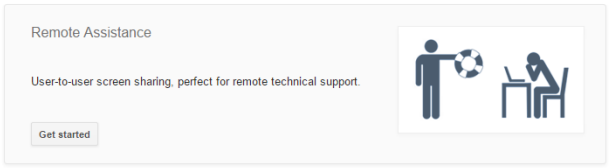
Instructions for accessing another users screen

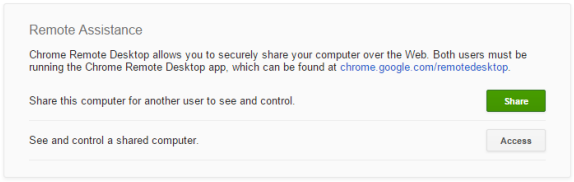
Accessing a Shared Screen



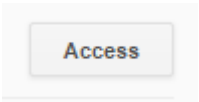
1. Load the **Chrome Web Browser** and be logged into your Google Account (username@my.heartland.edu),
2. Click on **Apps** in the Bookmarks Bar (under the URL address) or go to chrome://apps/,
3. Click **"Chrome Remote Desktop"** from the list of Apps shown,

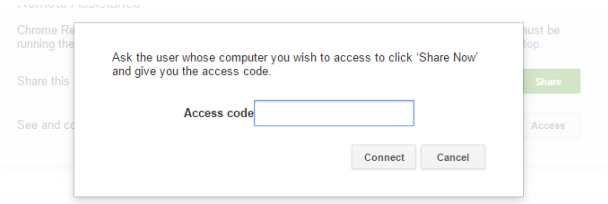


4. Remote Assistance is available at the top of the screen. Click the **Get Started** button,

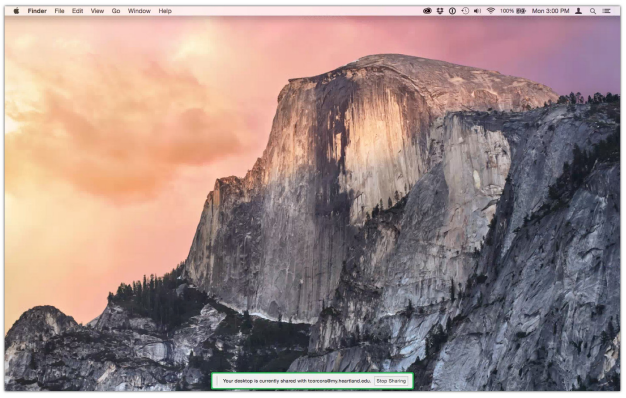


5. click **Access** to see and control a shared computer,





6. Get the **access code** from the student and type the code into the box for Access code (a 12 digit code),
7. click **Connect**,



8. Minimize the student's open Chrome Remote Desktop App and Chrome Web Browser and you will be able to see and control their desktop,

9. You will have control of the student's desktop until they (or you) click the Stop Sharing button at the bottom of their desktop screen.
